What is a Grow Rack?

A rack that was designed to allow for live plant transportation and point of purchase sales.

- A standard unit holds over 50sq ft of seedlings, potted plants, and flowers.
- Rigid frame and heavy duty design which reduces damage to the product.
- Easily adjustable shelves optimizing rack utilizations.
- Hitch, tow bar, and locking brake system are standard with each unit.
- Dimensions: 61.5"W x 30.5"D x 90"H (height includes casters)

Benefits for your greenhouse!

- No need for forklifts or pallet jacks: Carts with casters allow for easy transport and movement at retail locations.
- Save valuable space in your greenhouse. Ideal for mobile retail displays.
- Moves easily through narrow greenhouse aisle on premium rubber casters.
- Long asset life from use of a customized and durable powder coat finish and galvanized steel shelves.
- Truck-friendly dimensions optimized for 53' trailers.

Why Should You Choose AGR?
